## Auxiliary closed brake for I'D®

The auxiliary closed brake is designed for I'D self-braking descenders. It increases the friction as required for the load weight and the rope diameter and provides a constant redirect of the rope.

---

**Short Description** Auxiliary closed brake for I'D S, I'D L and I'D EVAC self-braking descenders

---

**Selling Points**

- Designed for I'D S, I'D L and I'D EVAC self-braking descenders
- May be used to increase the friction in accordance with the weight of the load and diameter of the rope
- Closed version provides a constant redirect of the rope. Once installed, the rope can not be removed easily
- Suited for use in rescue kits

---
