TECTRA 11mm low stretch rope, gold

RS110G

Kernmantel nylon rope has a core of parallel or braided strands (the core or kern) surrounded by a tightly woven sheath (mantel).

The tightly woven sheath protects the core from UV light, cutting, dirt and abrasion.

High twist yarn gives excellent handling & knotability.

Low stretch ropes are suitable for suspension of a load yet capable of absorbing energy in the case of a fall with a fall factor less than one.

Tectra ropes are specially designed for use in a wide range of situations and with modern rope devices.

6.5% shrinkage, 5% elongation in use.

Specifications:

Size:

Materials: Polyamide

EN test Mass:

Loading: 32 kN MBL (un-knotted), 22kN MBL (sewn), 18kN MBL (knotted)

Weight (kg): 0.08

Conformity: EN1891 (A)

Markets: All work at height industries, fire and rescue service
