

RescuePack ProSeal rescue system 25m 20Y

WK32025S

Rescue system for recovery of suspended person by lowering/lifting

The most simple yet versatile award winning self contained dedicated rescue system available. Can recover a suspended person from almost any fall protection system by lowering and lifting.

RescuePack delivers a mechanical advantage for lifting of around 3:1 by the use of the alloy rope grab HURRICANE. Rope device can pay rope out but lock when a load is applied.

Can be used in very constricted space and does not need anchor points to be placed in specific positions. Patented Hurricane pulley mechanism can be placed on the rope at any point for recovery.

The locking extendable rescue pole extends up to 3.5m and allows immediate connection to the harness of a person hanging suspended after a fall. High strength pole and heavy duty design is rigid when fully extended, with sturdy locking mechanism and unique quick release bracket. The pole is non-conductive.

This method of casualty attachment does not rely on being able to clip a specific attachment ring on the casualty - which may be difficult if an energy absorber has extended to its full length.

The complete system is supplied in a robust, sealed protective Kari bag within an interior hermetically sealed vacuum foil bag with integrated humidity indicator, giving the whole system a 20 year life span with simple easy to use inspection process. All contents are protected with a padded lining with inspection / reseal pack included.

From an environmental perspective, the ProSeal typically extends the useful life of the contained products, resulting in a more environmentally sustainable product. The desiccant used to maintain the internal atmosphere, Bentonite, is completely natural and fully biodegradable unlike silica which is highly resource intensive and polluting both to make and dispose of.

Components:

- RescuePole
- Hurricane
- Quadra rope device
- 120cm Anchor sling, protected
- Rope, standard length 25m with non-release hook
- Kit bag with shoulder straps
- Rescue Shears, Karabiner, screwlinks

Lengths available: 25m, 50m

Specifications:

NB: specifications and colour may change without notice.

Size: 25m

EN Test Mass: 200kg

Loading:

Conformity: Various EN Approvals

Materials: Various

Weight (kg): 6.50

Industries: Facilities, scaffolding, overhead lines, process, ports, entertainment.

All our PPE, rescue and lifting equipment have both UKCA and CE conformity where applicable
